# ABOUT ME

A bored egotistical genius who enjoys problem-solving, puzzles and riddles. A master in Chess, proficient in guitar and able to speak, read and write fluently in 3 languages. A pro-butterfly swimmer who can dolphin so beautifully; its eyegasm. Also a part time webb and an expert exaggerator.

I intend to improve my knowledge in the web development department, which includes familiarizing myself with HTML, CSS, Javascript, PHP and improving my fluency among them. I would also want to get used to using frameworks based of these languages and mainly want to become fluent enough that I can troubleshoot and understand most errors and why are they happening. Recently I learned to make website responsive, some of the general rules are to use % as unit over px, using rem as a unit of size for fonts. And the fact that you cannot manipulate width and height of most elements directly so therefore they must be covered in div tag first. Lately been improving my knowledge on nesting tag, displays, positioning etc.

This website has the best design in my opinion --> <http://bhindi.myweb.cs.uwindsor.ca/>

My portfolio has the best design because not only it uses mixture of multiple web-development languages but also because it uses bootstrap framework and those smooth animations looks so fluid. This website screams of professionalism. I also really like the font, how simple it is and how easy it is to maneuver.

This website screams of professionalism. I also really like the font, how simple it is and how easy it is to maneuver.

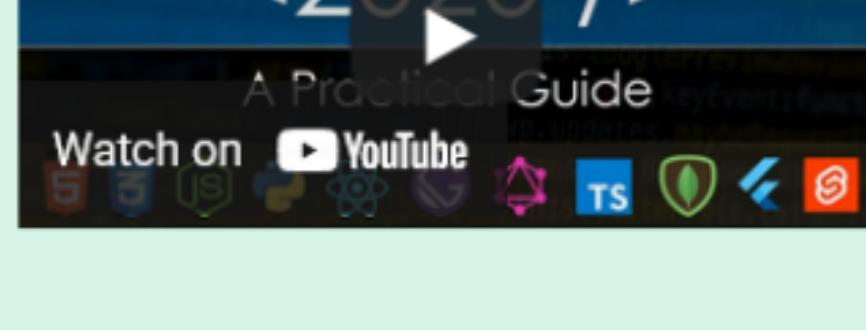

# ABOUT ME

A bored egotistical genius who enjoys problem-solving, puzzles and riddles. A master in Chess, proficient in guitar and able to speak, read and write fluently in 3 languages. A pro-butterfly swimmer who can dolphin so beautifully; its eyegasm. Also a part time weeb and an expert exaggerator.

I intend to improve my knowledge in the web development department, which includes familiarizing myself with HTML, CSS, Javascript, PHP and improving my fluency among them. I would also want to get used to using frameworks based of these languages and mainly want to become fluent enough that I can troubleshoot and understand most errors and why are they happening. Recently I learned to make website responsive, some of the general rules are to use % as unit over px, using rem as a unit of size for fonts. And the fact that you cannot manipulate width and height of most elements directly so therefore they must be covered in div tag first. Lately been improving my knowledge on nesting tag, displays, postioning etc.

This website has the best design in my opinion -->

56     >
57   </h3>
58   <p>
59     My portfolio has the best design because not only it uses mixture of
60     multiple web-development languages but also because it uses bootstrap
61     framework and those smooth animations looks so fluid. This website screams
62     of professionalism. I also really like the font, how simple it is and how
63     easy it is to manuver.
